AKADEMIYA2063 Ukraine Crisis Webinar Series – Session V

Join us Online

The Ukraine Crisis and African Economies

*Predicting Food Crop Production in times of Crisis:
The Case of Wheat in South Africa*

In response to the Russia-Ukraine conflict and its impact on African countries, AKADEMIYA2063 developed the Ukraine Crisis Brief Series, a comprehensive research series to provide evidence-based simulations of the ramifications of the crisis. Hinged upon data, analytics, and past crisis patterns, the AKADEMIYA2063 Ukraine Crisis Brief Series analyzes the economic and socio-economic impacts of global market disruptions induced by the Russia-Ukraine conflict. These research findings are published on AKADEMIYA2063's Ukraine Crisis and African Economies portal.

Session V of the AKADEMIYA2063 Ukraine Crisis Webinar Series will discuss the importance of food crop production forecasting in times of crisis, with a focus on wheat in South Africa.

Based on AKADEMIYA2063's Ukraine [Brief 11](#), "Predicting Food Crop Production in Times of Crisis: The Case of Wheat in South Africa," the session will highlight the importance of data for optimal African agricultural growth. The speaker will equally discuss the fertilizer and wheat price increases and how it will negatively impact South Africa's agricultural production in the current and coming seasons.
