The Ukraine Crisis and African Economies
Transmission of Global Price Shocks to Local Commodity Markets in Malawi

In response to the Russia-Ukraine conflict and its impact on African countries, AKADEMIYA2063 developed the Ukraine Crisis Brief Series, a comprehensive research series to provide evidence-based simulations of the ramifications of the crisis.

Hinged upon data, analytics, and past crisis patterns, the AKADEMIYA2063 Ukraine Crisis Brief Series analyzes the economic and socio-economic impacts of global market disruptions induced by the Russia-Ukraine conflict. These research findings are published on AKADEMIYA2063’s Ukraine Crisis and African Economies portal.

Session IX of the AKADEMIYA2063 Ukraine Crisis Webinar Series will discuss the impacts of the Ukraine Russia Crisis on commodity prices in local markets in Malawi.

Based on AKADEMIYA2063’s Ukraine Brief 10, "The Russia-Ukraine Conflict: Impacts on Commodity Markets in Malawi," the session will analyze the short-run effects of the Russia-Ukraine war on commodity prices across local markets in Malawi and the varying effects on urban and rural populations. The speaker will also look at potential measures to increase future production and mitigate the impact of the war on food prices.
