

AAGWa Crop Production

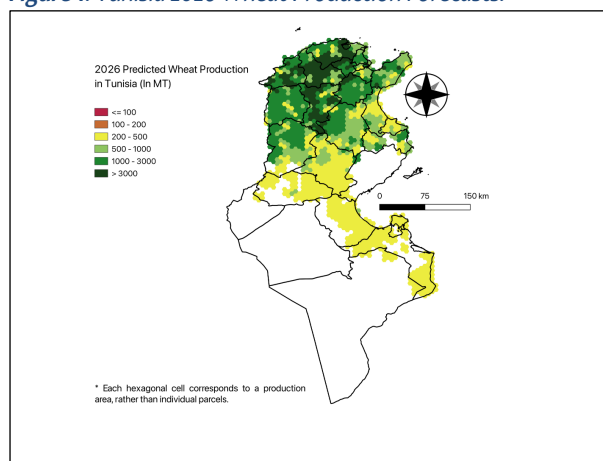

Forecasts Brief Series Tunisia – Wheat

Mansour Dia* and Khadim Dia**

No. 365, May 2026

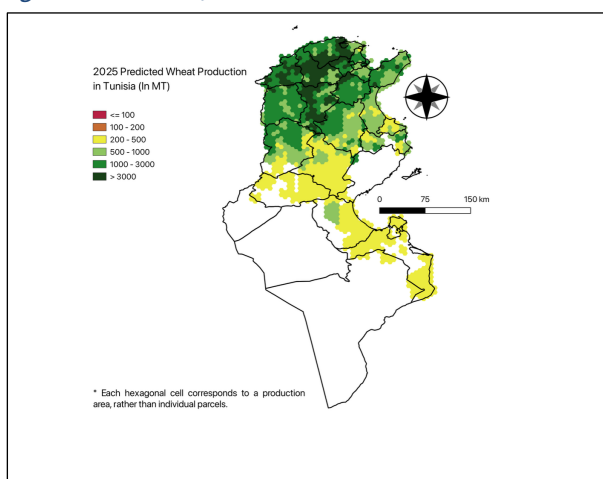

The crop production forecasts brief series by AKADEMIYA2063's Africa Agriculture Watch (AAGWa) aims to provide more accurate and timely data on harvests and yields for 11 major crops across nearly 50

Figure 1. Tunisia 2026 Wheat Production Forecasts.

Figure 2. Tunisia 2025 Wheat Production Forecasts.

Data source: Africa Agriculture Watch (www.aagwa.org).

with differences of 3,869 MT, 2,134 MT, 1,811 MT, 1,790 MT, and 1,762 MT, respectively. These correspond to changes of 17%, 11%, 6%, 17%, and 6%.

African countries. The timeliness, wide availability, and ease of access to this type of data will enable stakeholders across the value chain to plan and execute policy and business actions more efficiently. The data published in the briefs are generated through the Africa Crop Production (AfCP) model, an Artificial Intelligence (AI)-based model applied to remotely sensed geo-biophysical data to produce estimates at pixel as well as administrative levels as early as the beginning of each growing season. In Brief 365, we provide forecasts on Wheat production in Tunisia.

In 2026, wheat production in Tunisia is projected to reach 1,387,270 metric tons (MT), indicating a 1% increase over 2025 production levels. The highest wheat producers are expected to be Joumine (Bizerte), Béja Nord (Béja), Bir Mchergua (Zaghuan), Tébourouk (Béja), and Fahs (Zaghuan), with production levels estimated at 42,319 MT, 42,117 MT, 35,899 MT, 35,014 MT, and 33,359 MT. In contrast, lower production values are observed in Tataouine Nord (Tataouine), Ouerdanine (Monastir), Moknine (Monastir), Sahline (Monastir), and Ksibet El Mediouni (Monastir) with production of 391 MT, 391 MT, 391 MT, 390 MT, and 386 MT, respectively.

Compared to 2025, the most significant wheat production increases in 2026 are expected in districts such as Alaa (Kairouan), Oueslatia (Kairouan), Fahs (Zaghuan), Ayoun (Kasserine), and Rouhia (Siliana),
