

AAGWa Crop Production Forecasts Brief Series Senegal – Groundnut

Aïssatou Ndoye*, Mansour Dia**, and Khadim Dia***

No. 53, September 2023

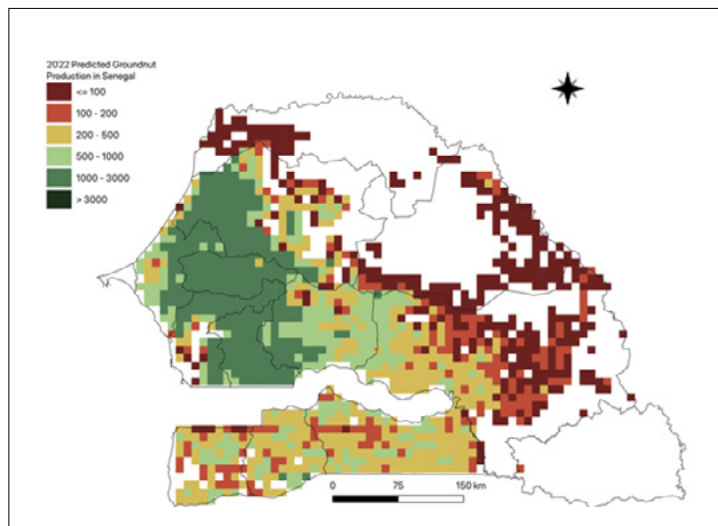

The crop production forecast brief series by AKADEMIYA2063's Africa Agriculture Watch (AAGWa) aims to provide more accurate and timely data on harvest and yields for nine major crops across nearly 50 African countries. The timeliness, wide availability, and easy access to this type of data will allow stakeholders across the value chain to better plan and execute policy and business actions more efficiently. The data published in the briefs are generated through the Africa Crop Production (AfCP) model, an Artificial Intelligence (AI-based) model applied to remotely sensed geo-biophysical data to produce estimates at pixel as well as administrative levels as early as the beginning of every growing season. In Brief 53, we provide forecasts on groundnut production in Senegal.

Figure 1. Senegal 2023 beans production.

Data source: Africa Agriculture Watch (www.aagwa.org).

Figure 2. Senegal 2022 groundnut production forecast.

Data Source: Africa Agriculture Watch (www.aagwa.org).

In 2023, groundnut production in Senegal is projected to reach 857,834 metrics tons (MT), which corresponds to a 5% increase over 2022 production levels. The highest sorghum production levels are expected in the Western departments, particularly in Louga, Kébémér (Louga), Mbacké (Diourbel), Niore du Rip (Kaolack), and Kaolack with production volumes estimated at 65,973 MT, 65,418 MT, 50,262 MT, 42,872, 41,443, and 40,652 MT, respectively. In comparison, lower production values are observed in Podor (Saint-Louis), Salémata (Kédougou), Dagana (Saint-Louis), Matam, Kanel (Matam), and Bakel (Tambacounda), with production levels of 35 MT, 105 MT, 319 MT, 1,360 MT, 1,363 MT, and 2,464 MT, respectively.

Moreover, the most significant groundnut production increases in 2023 are expected to occur in Tambacounda, Koupentoum (Tambacounda), Médina Yoro Foula (Kolda), Fatick, and Koungeul (Kaffrine), with differences of, 3,713 MT, 2,911 MT, 2,310 MT, 2,174 MT, and 2,069 MT, respectively. These correspond to changes of, respectively, 14%, 8%, 11%, 6%, and 7%.

Total		857834	819388	38446	5%

MT (Metric tons): 1 MT is equivalent to 1,000 kilograms.

Change: refers to the relative difference and is calculated as (2023 prod – 2022 prod) divided by 2022 prod.
