

AAGWa Crop Production Forecasts Brief Series

Algeria – Wheat

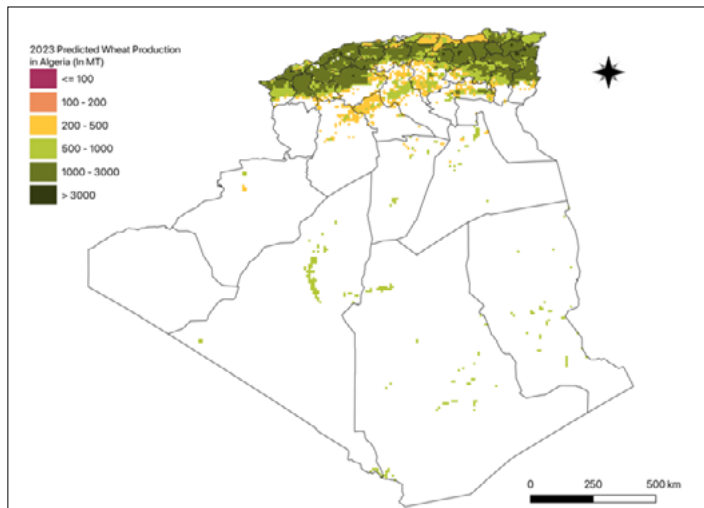

Aissatou Ndoye*, Mansour Dia**, and Khadim Dia***

No. 76, October 2023

The crop production forecast brief series by AKADEMIYA2063's Africa Agriculture Watch (AAGWa) aims to provide more accurate and timely data on harvest and yields for nine major crops across nearly 50 African countries. The timeliness, wide availability, and easy access to this type of data will allow stakeholders across the value chain to better plan and execute policy and business actions more efficiently. The data published in the briefs are generated through the Africa Crop Production (AfCP) model, an Artificial Intelligence (AI-based)

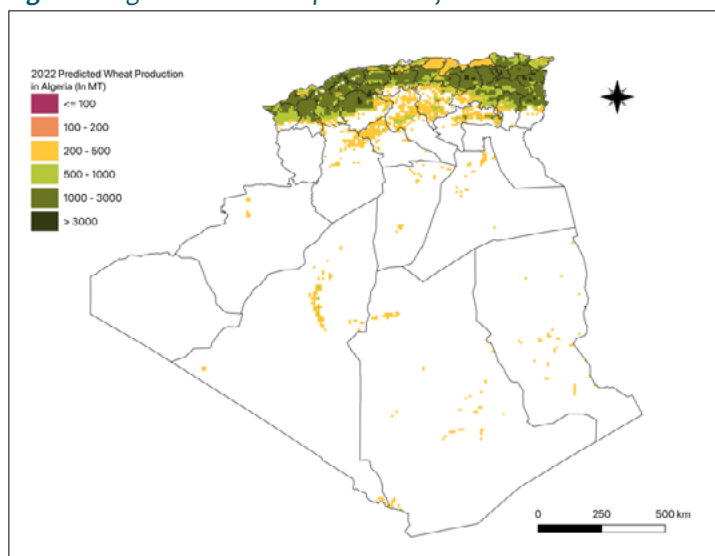

model applied to remotely sensed geo-biophysical data to produce estimates at pixel as well as administrative levels as early as the beginning of every growing season. In Brief 76, we provide forecasts on wheat production in Algeria.

Figure 1. Algeria 2023 Wheat production forecast.

Data Source: Africa Agriculture Watch (www.aagwa.org).

Figure 2. Algeria 2022 Wheat production forecast.

Data Source: Africa Agriculture Watch (www.aagwa.org).

In 2023, wheat production in Algeria is expected to reach 3,057,141 metric tons (MT), which corresponds to a 6% increase over 2022 production levels. The highest wheat production levels are expected in the northern part of the country such as, Oglia Melha (Tébessa), Frenda (Tiaret), Takhemaret (Tiaret), Chrea (Tébessa), Faidja (Tiaret), and Oum El Bouaghi (Oum el Bouaghi), with production estimates reaching respectively, 13,691 MT, 13,058 MT, 12,635 MT, 11,753 MT, 11,652 MT, and 11,154 MT.

In contrast, production is projected to be lowest in areas including Tessala-El-Merdja (Alger), Kolea (Tipaza), Souhan (Blida), Bougara (Blida), Tipaza, and Tamokra (Béjaïa) with levels of respectively, 330 MT, 330 MT, 333 MT, 335 MT, 335 MT, and 336 MT.

Compared to 2022, the most significant wheat production increases are expected to occur in areas such as Hamadia (Tiaret), Illizi, In Salah (Tamanghasset), Ain Zerga (Tébessa), and Mellakou (Tiaret) with differences of respectively, 5,244 MT, 5,053 MT, 3,230 MT, 2,969 MT, and 2,950 MT. These represent changes of respectively, 339%, 103%, 106%, 38%, and 74%.
