

# AAGWa Crop Production Forecasts Brief Series Togo – Cassava

Aïssatou Ndoye,\* Mansour Dia,\*\* and Khadim Dia\*\*\*

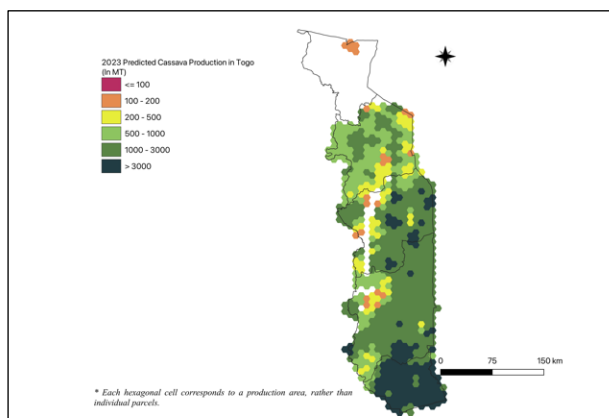

No. 98, November 2023

The crop production forecast brief series by AKADEMIYA2063's Africa Agriculture Watch (AAGWa) aims to provide more accurate and timely data on harvest and yields for nine major crops across nearly 50 African countries. The timeliness, wide availability, and easy access to this type of data will allow stakeholders across the value chain to better plan and execute policy and business actions more

efficiently. The data published in the briefs are generated through the Africa Crop Production (AfCP) model, an Artificial Intelligence (AI-based) model applied to remotely sensed geo-biophysical data to produce estimates at pixel as well as administrative levels as early as the beginning of every growing season. In Brief 98, we provide forecasts on Cassava production in Togo.

In 2023, Cassava production in Togo is projected to reach 1,000,072 metric tons (MT), corresponding to a 7% increase in volume of production over the previous year.

**Figure 1.** Togo 2023 Cassava production forecast.

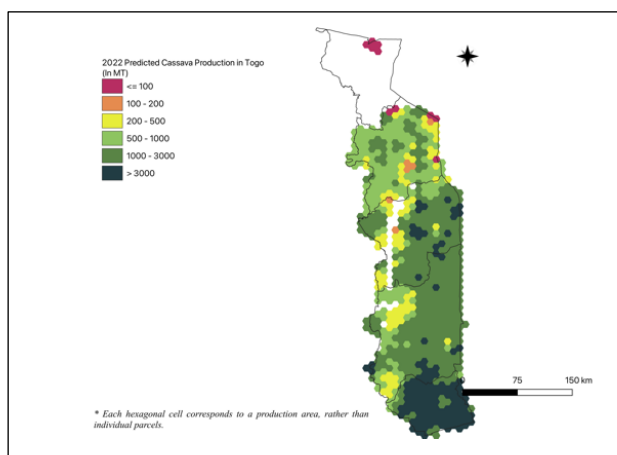

Data source: Africa Agriculture Watch ([www.aagwa.org](http://www.aagwa.org)).

However, the highest production levels over 400,000 MT are expected to occur in districts such as Zio (Maritime), Haho (Plateaux), Tchamba (Centre), Est-Mono (Plateaux), Vo (Maritime), and Yoto (Maritime), with production estimated at, 122,793 MT, 80,421 MT, 77,746 MT, 67,850 MT, 66,589 MT, and 58,472 MT, respectively. In contrast, the production is projected to be lower in Naki-Ouest (Savanes), Lomé (Maritime), Danyi (Plateaux), Akébou (Plateaux), and Bimah (Kara), with production of 195 MT, 1,901 MT, 3,168 MT, 3,833 MT, and 4,401 MT.

Compared to 2022, the most significant cassava production increases in 2023 are expected in the southern areas such as in Avé (Maritime), Zio, Vo, Yoto, Haho, and Est-Mono, with differences of, 13,448 MT, 9,607 MT, 6,659 MT, 5,142 MT, 2,986 MT, and 2,659 MT, respectively. These correspond to changes of, respectively, 34%, 8%, 11%, 10%, 4%, and 4%.
